

# **Fictional Westbridge College Academic Integrity and AI Policy**

Policy version: 2026.1

Students must submit work that represents their own learning, research, and writing. Assistance from writing centres, grammar tools, dictionaries, citation managers, and approved software is permitted when it does not replace the student's own authorship.

Use of generative AI is allowed only when:

1. The assessment instructions permit support use.
2. The student does not submit generated text as original work.
3. The student can explain the process used to create the submission.
4. The student keeps records such as prompts, drafts, source notes, or revision history when asked.

Review panels should consider source records, drafts, version history, and student explanation before drawing conclusions about misconduct.
